

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A gaming terminal for playing a wagering game, comprising:
an input device configured to receive a wager input from a player for playing a wagering game;
a display device configured to display
a basic game having a plurality of symbols that indicate a randomly selected outcome of said basic game, said randomly selected outcome being selected in response to ~~the~~ a wager input by ~~the~~ a player; and
a progressive game feature having a progressive award that is triggered by a predetermined event, said progressive award including a plurality of free plays increasing based on said wager ~~input~~ being received at said gaming terminal and other wager inputs being received from other gaming terminals, said progressive award having ~~has~~ an actual value determined by said plurality of free plays of said progressive award follow-up game play by said player at said gaming terminal.
- 2-3. (Cancelled)
4. (Currently Amended) The gaming terminal of claim 1 2, wherein said plurality of free plays ~~the number of said free spins of the basic game~~ yields a monetary or non-monetary value associated with randomly selected outcomes of said plurality of free plays ~~free spins of said basic game.~~
- 5-6. (Cancelled)

7. (Currently Amended) The gaming terminal of claim 1, wherein said progressive award is associated with a multiplier value, said multiplier value increasing ~~increases~~ the value of a monetary award achieved in said plurality of free plays ~~follow-up game play~~.

8. (Original) The gaming terminal of claim 1, wherein said predetermined event is a selection of a progressive-award outcome from a plurality of progressive game outcomes that are randomly selectable in response to receiving said wager input.

9. (Original) The gaming terminal of claim 1, wherein said progressive award is measured in integers and increases by an incremental value for each wager input, said incremental value being a fraction of the integers associated with said progressive award.

10-15. (Cancelled)

16. (Currently Amended) The gaming terminal of claim 1, wherein said progressive game feature has multiple progressive awards that are determined by said plurality of free plays ~~follow-up game play by said player~~ at said gaming terminal.

17. (Currently Amended) The gaming terminal of claim 1, wherein said actual value may be zero based on said plurality of free plays ~~follow-up game play~~.

18-42. (Cancelled)

43. (Currently Amended) A method of playing a progressive wagering game having a progressive award, comprising:

accepting, at an input device, a wager input from a player for playing a wagering game;

conducting a basic game of the wagering game at a plurality of gaming terminals in response to receiving wager inputs;

displaying the basic game on respective display devices of the plurality of gaming terminals;

changing said progressive award in response to said wager inputs received at said plurality of gaming terminals, said progressive award including a plurality of free plays increasing based on said wager inputs received at said plurality of gaming terminals; and

in response to a randomly selected outcome being a progressive-award outcome, awarding said progressive award to a player, said progressive award having an actual value determined by ~~follow-up game play~~ by said player conducting said plurality of free plays at a respective one of said gaming terminals.

44. (Currently Amended) The method of claim 43, further comprising the step of allowing said player to engage in said plurality of free plays ~~follow-up game play~~.

45. (Cancelled)

46. (Currently Amended) The method of claim 43, further comprising the step of awarding to said player said actual value in response to outcomes achieved in said plurality of free plays ~~follow-up game play~~.

47. (Cancelled)

48. (Original) The method of claim 43, wherein said randomly selected outcome is an outcome that is not selected during said basic game.

49. (Original) The method of claim 48, wherein said randomly selected outcome is determined by a progressive-game controller that is external to said plurality of gaming terminals.

50. (Original) The method of claim 48, wherein said randomly selected outcome is determined after a preselected wager amount is received at one of said plurality of gaming terminals.

51. (Original) The method of claim 50, wherein said preselected wager amount is the maximum wager amount at said plurality of gaming terminals.

52. (Currently Amended) The method of claim 50, further including, in response to said wager input being more than said preselected wager amount and said progressive award being awarded, using a remainder of said wager input to determine if a consolation prize is won by said player, the remainder of said wager input being the difference between said wager input and said preselected wager amount.

53. (Currently Amended) The method of claim 50, wherein said progressive award has multiple levels and further including, in response to said wager input being more than said preselected wager amount and said progressive award being awarded, using a remainder of said wager input to determine a level of said progressive award that is awarded, the remainder of said wager input being the difference between said wager input and said preselected wager amount.

54. (New) A method of providing a progressive award, the progressive award including a number of free plays of a computerized game, each free play having a randomly selected outcome with a payoff amount, the method comprising:

using an input device to accept a wager input for providing wagering game play;
displaying the wagering game play on a display device of a gaming terminal;
in response to the wagering game play being displayed at one or more gaming terminals
linked to a progressive award, using a progressive game controller to increase the
progressive award by incrementing the number of free plays; and
in response to a triggering event resulting from the wagering game play, awarding the
current number of free plays associated with the progressive award.

55. (New) The method of claim 54, further including conducting the current number of free plays to determine an actual monetary value of the progressive award.
56. (New) The method of claim 55, wherein the actual monetary value is based on the payoff amount associated with the randomly selected outcome of each free play.
57. (New) The method of claim 54, wherein the one or more gaming terminals includes a plurality of gaming terminals.
58. (New) The method of claim 54, wherein the wagering game play includes wager inputs such that the increasing includes increasing the progressive award in response to the wager inputs.
59. (New) The method of claim 54, further including resetting the number of free plays to a startup value after the awarding of the current number of free plays.
60. (New) The method of claim 54, wherein the progressive award includes a first level and a second level, the first level including a first number of free plays of the computerized game, the second level including a second number of free plays of the computerized game, the increasing

including increasing the first number of free plays and the second number of free plays, the awarding including awarding the first number of the second number.

61. (New) The method of claim 54, further including displaying the progressive award on the one or more gaming terminals.

62. (New) The method of claim 54, further including displaying the progressive award on signage distinct from the one or more gaming terminals.

63. (New) The method of claim 54, further including displaying a representation of a fraction of a free play between the current number of free plays and a next higher whole number of free plays.
